Continuation of Substance of Interview including description of the general nature of what was discussed: The examiner called applicants' representative to suggest an amendment to claim 1 in order to put the application in condition for allowance. The examiner suggested to include a language that clearly defines the impulse drying of the tissues, i.e., to include that the nip through which the tissue is passed, is formed by a pressing roll and a heated drum, (same language of the other independent claims, claims 12 and 24). Mr. Pierotti agreed with the proposed amendment, see examiners' amendment.
